(54) Title: **WORKTABLE COMPRISING A MULTIDIRECTIONAL COUPLING**

(57) Abstract: A worktable (20) especially adapted for use in specialized professional fields such as the medical or dental fields where the worktable can be used to support instruments, supplies and apparatuses. A multidirectional coupling (24) enables the work platform (22) to translate along two horizontal axes and swivel about a vertical axis which allows the work platform (22) to be positioned horizontally relative to the worktable base (T) or an external structure to which the coupling (24) is attached. The work platform (22) can be displaced along the first and second translation axes and rotated about the swivelling axis at any position of the work platform (22) when the multidirectional coupling (24) operatively attaches the work platform (22) to the external structure (T).
